

## Carbon Trust – ANGLE Incubator

The [Carbon Trust - ANGLE Incubator](#) supports start-up companies developing technologies with real commercial potential that could significantly lower carbon emissions. The objective of the [Incubator](#) is to help qualifying companies become investor-ready, through the provision of up to £60k in incubation and consulting support. So far we have incubated fourteen companies developing a wide range of technologies. These companies raised over £9 million whilst in the [Incubator](#), with a further £15m being raised by Oxford Catalysts on its flotation on the Alternative Investment Market (AIM).

### Incubator company

### Company focus

ACAL Energy	Fuel Cells
AquaEnergy	Offshore wave energy converter
Clear Process	CO <sub>2</sub> extraction membrane
Clearpower Technologies	Offshore wave energy converter
CMR Fuel Cells	Fuel Cells
Ilika	Materials discovery
Iskra	Micro wind turbines
Oxford Catalysts	Catalysts
SAFC	Fuel Cells
TMO Biotec	Biofuel manufacture
Walcott Electric Machines	Electric motors
Oxford Biofuel Cells	Fuel Cells
Whitfield Solar	Solar concentrator
EKB Technology	Reactor technology

Whether you are a start-up or a spinout (either from academia or a large company), the [Incubator](#) provides a range of commercialisation services including strategy and business plan development, market and partner analysis, mentoring for the management team, product development advice, guidance on securing IP rights, and support with investor rounds or licence negotiations.

The objective of the [Incubator](#) is to help you build your team, hone your proposition and presentation, build a robust business case and prepare you for success through the next phase of financing for commercial growth.

The [Incubator](#) operates on a virtual basis from ANGLE's offices throughout the UK. Selection is competitive but the support you receive will accelerate your company along the road to success.
